C. B. DWIGHT,

Does all kinds of Work in

Cement & Stone Sidewalks & Curbing

He has on hand a large supply of Chinese Granite Curb and always keeps Hawaiian Curbing Stone. Estimates given and lowest prices assured. Telephone 303.

## PAUHI MEMORIAL HALL.

To be Completed About the First of the Year.

THE NEW EDIFICE PRESENTED BY C. R. BISHOP.

Description of the New Assembly Hall, Business College, Manual Training Quarters and New Class Rooms.

One of the most substantial and massive-looking structures in the Islands today is the new Pauhi Memorial Hall recently constructed in the grounds of Oahu College at Punahou, of which a faithful representation is given below. This handsome building is the result of a magnificent donation made by Ohas. R. Bishop, Esq., to perpetuate the memory of his deceased wife. Work was commenced on the building last November and it is hoped that it will be ready for occupancy immediately after the Christmas vacation.

The building is of blue lava from the quarry in Manoa Valley, which produces a very fine-grained and pretty stone, is of two stories with high basement underneath and central tower, terraces and verandas. Viewed from any aspect its architectural beauty commands favorable comment, although the front view is by far the most imposing. The extreme dimensions of the building are 104x70 feet and the height from the ground to the top of the observatory is some 75 feet.

The main entrance fronts on the large college campus from which one ascends handsome stone steps to the terrace which is protected and partly encased by the extending wings. On this terrace will be placed hundreds of beautiful palms and ferns in pots, all of which have been cultivated on the grounds and are now ready to be placed in position. On either side of the central flight of stairs leading from the main terrace to the upper floor are handsome doorways giving ingress to the main hallway, which is of an irregular semi-circular shape and about 20x54 feet in size. This central stair-case which is partly out of doors conducts the visitor to a landing from whence other flights ascend either on the right or left to the floor above. Directly in front of these stairs and in plain view from the landings and hall underneath will be a large mural tablet of brass with a suitable inscription to the donor of the building. There is also a side entrance and porch on the end facing the Bishop Hall of Science, while the entrance to the basement is on the other side of the building.

In the basement which will have a concrete and cement floor are two workrooms 28x30 and 20x28 feet respectively, designed for carpenter shops, turning lathes and other machinery, and printing office, all of which departments are to be gradually introduced into the college course. Here is also a room 20x75 feet for manual training, calisthenics, etc., besides the boys' lavatory 16x20 feet, and necessary toilet rooms. A hallway 18x60 also forms part of the basement arrangement. The ceilings of the basement throughout are eight feet high.

On the main floor to the right of the main stairway is a large

room 20x28 feet which will be especially fitted up for the uses of the Business College. A counter will be extended across the room with wire screening above similar to that lately put in Bishop's bank over which business transactions will be made just the same as in a large commercial institution. Stenography, typewriting and bookkeeping classes will use this room, the portion outside the counter being fitted with desks and the usual office furniture. Adjoining this room and at the end of the hallway which extends nearly across the length of the building, 20x54 feet, is the office of President Hosmer, a large and handsome room with a large bay window. Seated in a revolving chair in this bay window one can obtain a view of every building on the grounds and, by opening the door, of the main hallway and nearly the whole of the same floor. Electric bells will communicate with this room from all parts of the

Folding doors on either side of the hall open into large class rooms 29x28 and 20x20 feet. When necessary for public entertainments or otherwise these two rooms can be thrown into the main hall, making a hall 47x100 feet capacity.

In this hall night and morning the whole school will assemble for prayers and singing to the accompaniment of the organ.

In the rear of the organ loft is an iron spiral stairway leading to the observatory room above, which is twelve feet square. The observatory proper will be still above and will be twelve feet in diameter inside. It is modeled after the famous Lick Observatory at Mount Hamilton, California, and will be supplied with the necessary instruments. The college already owns a fine telescope. The floor of the observatory room is 48 feet from the ground, and the tower is constructed of masonry of the most substantial character to prevent any possible vibration.

equalled outside of San Francisco in scientific appliances for the study of chemistry, qualitative and quantitative analyses, and kindred studies. The old school hall is to be entirely remodeled and modernized as soon as Pauhi Hall is ready for use, but plans have not yet been adopted.

The need of a building and appliances for the promotion of physical culture and gymnasium purposes is becoming more and more apparent as time rolls by, and it is hoped something will be done to supply this want in the near future.

The gift of Hon. Charles R. Bishop of \$65,000 for the erection of a new Preparatory School, as mentioned in recent dispatches from the Coast, will add much to the usefulness of an already useful college and will be highly appreciated by every one connected with it.

Many improvements are to be made about the grounds, one of which is the building of a new road from the main entrance. This is to be changed from its present position to a point in the rear of Pauhi Hall and the roadway will go direct to the main buildings. It will be macadamized and ordered with suitable sidewalks, flower beds, palms, etc., for which preparations have already been made.

The stone fence around the grounds has been extended 1000 feet in the last two years, and the new portions planted with night blooming cereus. The whole fence has been covered with these beautiful flowers during the past few nights.

GEORGE MANSON.

## SCOURGE STILL STRIKES.

THREE NEW CASES OF CHOLERA AND ONE DEATH TODAY.

Seven Patients in Hospital Doing Nicely—Thirteen New Cases and Six Deaths Since Thursday Morning.

There were three cases of cholera today up till 2 o'clock.

1. Jack, reported at 9 a.m., age, 50; location, rear of Bayview; physician, Dr. Wayson.

2. Keakalekia, male, age 13, taken sick at 9 a.m.; locality, Asa; physician, Dr. Wayson; taken to hospital at 12 noon.

3. Paku, male, age 50; locality, Kekaulike street; physician, Dr. Smith; taken to hospital at 1:40 p.m.

From yesterday morning until 6:35 a.m. today, there were ten cases and six deaths. The deaths were as follows:

W. H. Goebel, U.S.S. Bennington, age 20.

Kaehalii, age 70, male; died on way to hospital.

Mary Kahiwahi, age 41.

Pilipo Kahimile, age 35, male.

Paaina, age 50, male.

Mrs. Alex. Smith took sick at 11:30 p.m. yesterday; King street; reported by Dr. Herbert; died at 6:35 a.m. today.

There have been thirteen cases from the afternoon of the 29th till the afternoon of the 31st, today, and six deaths.

Nobody is allowed to leave town without a permit from the Board of Health. The Health Office is open day and night.

Dr. McGrew and Dr. Surmann have both been called in to see cholera cases.

There are seven patients in the hospital at Kakaako. They were all doing nicely this afternoon.

PAUHI MEMORIAL HALL, OAHU COLLEGE.
